

**Cinevision Multimedia Inc.** is a Canadian Corporation, located in Victoria, British Columbia. We are a unique team, a one stop shop for your creative needs across a wide range of media disciplines.

Cinevision is an *Application Service Provider* (ASP), specializing in Internet Database Solutions, as well as media production - still, video, film and audio.

The web, and all it offers, is at the core of Cinevision's business model. As both creators and hosts of eBusiness solutions for clients in government, private and educational sectors, from the tourism industry to medical, electronics and telecommunication, we know the Internet does work. *We can make it work for you.*

Cinevision has kept pace with emerging Internet technologies, and maintains state-of-the-art web, FTP, database and other servers, complete with the latest developments in streaming media and interactive database solutions.

All good communication starts with good design... design that presents you and your message to your target audience with maximum impact. Our web design team is adept at translating visual ideas into viable, interactive web pages.

After we have created an eBusiness solution to suit your needs, our Internet Marketing department will lead the way for your site to get traffic you never thought was possible.

*"We measure our success  
by your satisfaction"*

But don't just take our word for it.  
Here's what one client has to say:

*"I'm thrilled with this new facility  
on my website. The RealTime  
Update System, automatic brochure  
production and no-code maintenance  
features free up considerable man-  
hours for more important things"*

April Prinz, Realtor

**Cinevision™**  
**RealTime Update System**

Cinevision Multimedia Inc. is offering to create your website that will:

- ✓ *Automatically keep your MLS listings current— to the second, for everyone viewing your website!*
- ✓ *Provide a “no code” web interface to enter your exclusive listings that you can use without having to have ANY programming knowledge!*

## Features:

### **Photo optimization**

Not only do the images from your MLS listing automatically appear on your site, the system even prepares them for the web by “colour reducing” the images, making the files smaller and faster loading, but without reducing the quality.

### **Database of your sold listings**

For as long as you have been entering information into the MLS system, we can display those records, divided by year, on your website. You can list every property you have ever sold, and it will update automatically every time you sell a new property.

### **Automatic open house brochures**

One of the best features of our system is the ability of your client to access a full page printable brochure of the selected property— right from your website. This full-colour flyer has all the pertinent property features, plus your contact information. Every listing also has a link to a three panel brochure, that only you have access to. This brochure you can personalize by adding your own comments and then print and distribute it at functions, open houses or showings. This feature saves you time and money when creating brochures for your properties.

### **“House finder” client request**

When a client visits your site but doesn't find exactly what they are looking for, they can enter the criteria of their search into our comprehensive form, automatically creating a database record— and notifying you by email of the request. You can then search for this property, plus you have a record of the information of the lead, enabling you to send other listings to them in the future.

### **SOLD banners on completed listings**

If you sell a property on the MLS system, it is automatically added to your SOLD page. If you sell an exclusive listing, simply go to the property record in your Admin section and click “SOLD”, and it will appear as sold in your listings. It's as simple as that!

### **Custom features**

Is there a feature or facility that you would like to have on your site? Talk to us. We'd be happy to work with you to make your site the best in the business.

## A complete website package:

<b>You will get:</b>	<b>Benefits:</b>
Professional Website Design	Attractive, efficient, easy-to-navigate website. Or simply add the <i>RealTime</i> system to your current site.
Website Hosting on a high-bandwidth server	A site that is ‘always up’— 24/7/365 — and loads quickly.
Real-time Web page updates from the MLS system	As soon as you enter your properties into the MLS system, your website will automatically reflect the changes and additions. No more double entry MLS/HTML programming, saving you time and money.
Exclusive Listings Web Form	Easy to use interface for entering or updating your exclusive properties, with 128-bit secure login. No more HTML and database programming.
Low cost, low maintenance	Cinevision offers more than competitive pricing.
